Kolay Ev: Parts of the House

One A3 sheet · cut, fold, glue · about 40 minutes

1. Printing (copy shop or home)

• File: kolay-ev-A3-en.pdf → A3, COLOUR, MATTE COATED CARD 250-300 gsm.
• Scale 100% (Actual size). No A3? Print the A4 file; the house comes out a bit smaller.
• You also need: scissors, a glue stick, a ruler and an empty ballpoint pen.

2. Building

1) Cut along the solid lines. You get 8 pieces: the house (one piece), the upstairs floor and 6 small items.
2) Score: run the empty pen along every dashed line with a ruler, so the card folds without cracking.
3) Fold every dashed line with the PRINTED SIDE INSIDE.
   The side walls come forward and the floor (with the garden) lies forward. The house stands like a box corner.
4) Glue: tuck the grey tabs under the side walls inwards and glue them UNDER the floor.
5) Upstairs: fold the 3 grey tabs of the upstairs floor up. Put glue on their backs and
   press them onto the white “TAB” strips on the walls. Left half is the bedroom, right half the bathroom.
6) Furniture: fold each item's bottom tab back and glue it to the floor.
   Bed and bathtub go upstairs, table in the kitchen, sofa in the living room, tree and flowers in the garden.

Tip: everything is already in colour. Children can still colour the furniture or draw pictures on the walls.

3. Video script (about 45 seconds)

Hello! My name is ___.

This is my house.

This is the kitchen. In the kitchen, we eat.

This is the living room. In the living room, we watch TV.

This is the bathroom. In the bathroom, I take a shower.

This is the bedroom. In the bedroom, I sleep.

This is the garden. In the garden, I play.

I love my house! Thank you!

Point at each room while saying its sentence.
Filming: daylight, phone landscape and steady, TV off. Two or three takes are enough.
